Sequence 146, Application US/10403161

Sequence 146, Application No. US2004004330A1

GENERAL INFORMATION:

APPLICANT: Anderson, David et al.

TITLE OF INVENTION: NOVEL PROTEINS AND NUCLEIC ACIDS ENCODING SAME

FILE REPERENCE: 21402-573C

CURRENT APPLICATION NUMBER: US/10/403,161

CURRENT FILING DAFF: 2003-03:31
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ;

Patent No. US20020034494A1

GENERAL INFORMATION:

APPLICANT: Vicari, Alais P.

APPLICANT: LaFace, Drake

TILE OF INVENTION: Chemokines as Adjuvants of Immune Response

TILE OF INVENTION: Chemokines us Adjuvants of Immune Response

TILE OF INVENTION: Chemokines us Adjuvants of Immune Response

TILE OF INVENTION: Chemokines us Adjuvants of Immune Response

TILE NEFERRACE: SF0896K US

CURRENT APPLICATION NUMBER: US/09/768,917

CURRENT APPLICATION NUMBER: EP 0 974 357

PRIOR APPLICATION NUMBER: EP 0 974 357

PRIOR PILING DATE: 1998-07-16

NUMBER OF SEQ ID NOS: 10

SOFTWARE: PatentIn Ver. 2.1

SEQ ID NO 10

LENGTH: 21
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
